Homework Report 1

Problem 1

Here is the template for writing your reports that accompany the programming assignments. These reports should be named `report.pdf` and should be handed in **electronically** with your code. They should **not** be printed and handed in with the written portion of the assignment. In these reports, we will ask you to explore a dataset or multiple datasets using the algorithms that you have implemented for the coding portion of the assignment.

Problem 2

Some questions might just require you to write some text but sometimes it might be beneficial or necessary to display a graph or image. For more info on inserting images in Latex feel free to visit **this page**.
